## **MARK BERENDS**

**Professor of Sociology  
University of Notre Dame  
4110A Jenkins-Nanovic  
Notre Dame, IN 46556-7000  
(574) 631-0195 (office)  
[mberends@nd.edu](mailto:mberends@nd.edu) (e-mail)**

### **EDUCATION**

Ph.D., Sociology, 1992, University of Wisconsin-Madison  
M.S., Sociology, 1988, University of Wisconsin-Madison  
B.A., Sociology, 1985, Calvin College

### **PROFESSIONAL EXPERIENCE**

2009-present—Professor of Sociology, University of Notre Dame  
2009-present—Director of the Center for Research on Educational Opportunity (CREO), University of Notre Dame  
2014-present—Chair, Notre Dame Program for Interdisciplinary Educational Research (PIER) Faculty Committee  
2015-2018—Co-Editor, *American Educational Research Journal*  
2015-2016 — Vice President of the American Education Research Association’s Division L, Policy and Politics of Education  
2014, Fellow American Educational Research Association  
2013-2015—Co-Editor, *Education Evaluation and Policy Analysis*  
2013-2014—Program Chair, American Educational Research Association  
2005-2011—Director of the National Center on School Choice (NCSC), Vanderbilt University, Peabody College (IES Funded)  
2004-2005—Assistant Director of the National Center on School Choice (NCSC), Vanderbilt University, Peabody College (IES Funded)  
2002-2008—Associate Professor of Public Policy and Education, Department of Leadership, Policy, and Organizations, Vanderbilt University, Peabody College  
2007-2010 — Vice President of the American Education Research Association’s Division L, Policy and Politics of Education  
2003-2005—Director of Graduate Studies, Department of Leadership, Policy, and Organizations, Peabody College, Vanderbilt University  
2002-present—Adjunct Senior Social Scientist, RAND  
2000-2002—Senior Social Scientist, RAND, Washington, DC  
2002—Adjunct Professor of Educational Policy and Leadership, University of Maryland  
1998-2000—Social Scientist, RAND, Washington, DC  
1992-1997—Associate Social Scientist, RAND, Washington, DC  
1991-1992 —Data Coordinator, Center on Organization and Restructuring of Schools, Wisconsin Center for Educational Research, Madison, Wisconsin  
1991 —Lecturer, Department of Sociology, University of Wisconsin-Madison  
1990-1991 —Project Assistant, Center on Organization and Restructuring of Schools, Wisconsin Center for Educational Research, Madison, Wisconsin  
1986-1990 —Project Assistant, National Center on Effective Secondary Schools, Wisconsin Center for Educational Research, Madison, Wisconsin

## RESEARCH AREAS

Throughout his research career, Professor Berends has focused on how school organization and classroom instruction are related to student achievement, with special attention to disadvantaged students. Within this agenda, he has applied a variety of quantitative and qualitative methods and macro- and micro-level approaches to understanding the relationships among school reforms and the outcomes for teachers and students. In the 1990s, he led the summative evaluation of New American Schools (NAS), at the time the largest privately funded reform movement in the nation. The overall finding of his work was that extensive further development of the reform models and careful alignment of the school system were essential to promoting further innovative instructional strategies and gains in student achievement.

As a result of this research, the U.S. Department of Education invited Professor Berends' participation in the national evaluation of Title 1 and the Comprehensive School Reform programs. In addition, he examined the relationships of changing families and schools on student achievement between 1972 and 2004. The goal was to understand how these changes during different reform periods related to the black-white and Latino-white achievement gaps. Important improvements for black and Latino students were the improved socioeconomic conditions of their families and the increased perception of within school opportunities. Moreover, had resegregation not occurred over this time period, the achievement gaps would have closed even more. This research was included in an amicus brief submitted to the U.S. Supreme Court in cases about school choice and the use of race as a deciding factor in Seattle, WA and Louisville, KY. The brief marks only the fifth time in its history that the court has considered social science research during its deliberations, beginning with *Brown* in 1954.

Professor Berends' current research relies on experimental and quasi-experimental designs to focus on three primary areas: (1) the effects of school choice (particularly charter and Catholic schools) on student achievement growth; (2) the scale-up of a reading intervention in Haiti; and (3) the effects of ability grouping and tracking on students' academic and social outcomes in nationally representative samples over the past 30 years. His recent books include *The International Handbook of the Sociology of Education* (SAGE London, forthcoming), *Handbook of Research on School Choice, 2<sup>nd</sup> edition* (Routledge, forthcoming), *Education at the Crossroads* (Routledge, forthcoming), *School Choice and School Improvement* (Harvard Education Press, 2011), and *Leading with Data* (Corwin, 2009).

### **School Choice and Educational Innovations**

In 2011, Indiana passed education policies on charter schools and vouchers, increasing parents' options for enrolling their children in schools that best meet their needs. The state instituted the *Indiana Choice Scholarship Program*, providing qualifying families with state-funded vouchers to offset tuition costs at participating private schools. And it expanded the number of public charter schools to 75—nearly double that of 5 years earlier—serving about 24,000 students statewide. Though it hosts one of the largest voucher programs in the United States, currently serving about 32,000 students, little is known about its effects on Indiana schools and students. Likewise, little is known about the effects of the Indiana charter school expansion on student outcomes.

Funded by the Spencer Foundation, the three-year study will examine the following research questions: (1) What is the impact of the Indiana Choice Scholarship Program (vouchers) on student achievement gains and the schools these students attend? (2) What is the impact of the charter schools on student achievement gains? (3) Are these voucher and charter school impacts greater for some groups of students compared with others, having effects on the racial/ethnic and socioeconomic achievement gaps? (4) How

do schools of choice (charter or private schools) differ from traditional public schools in terms of organizational and instructional conditions, school leadership, professional capacity, school learning climate and funding conditions, and parent involvement and support that promote achievement?

We will examine the achievement gains of students receiving vouchers to attend private schools and students choosing to attend a charter school in the state of Indiana. Because students in traditional public, charter, and private schools all take the same state assessments, we have a unique opportunity to examine achievement outcomes across students and school sectors using longitudinal student assessment data from the Indiana Department of Education. With additional longitudinal data collected from schools and teachers in a representative sample of K-8 traditional public schools, charter schools, and private schools, we will be able to examine the conditions under which the impacts of the voucher and charter schools occur. With Joe Waddington at the University of Chicago and NORC of the University of Chicago, the study will gather survey data from 600 schools and about 6,000 teachers in Year 2 of the study.

Dr. Berends also served as Director of the National Center on School Choice (<http://www.vanderbilt.edu/schoolchoice/>) awarded a \$13.3 million grant by the Institute for Education Sciences of the U.S. Department of Education. Partners included the Brookings Institution, Brown University, Harvard University, Indiana University, the National Bureau of Economic Research (NBER), the Northwest Evaluation Association (NWEA), Stanford University, University of Indianapolis, and the University of Wisconsin. The NCSC's projects include research on the effects of charter schools on student achievement, teacher recruitment and teaching quality, curriculum and instruction, and parental involvement. A second set of projects focus on the effects of competition on public schools and systems using the nation's largest student achievement growth database of NWEA.

### **Randomized Field Trials of Reading Interventions at Scale**

With a team of colleagues at Notre Dame's Alliance for Catholic Education (ACE), Dr. Berends is involved in ACE Haiti. After the 2010 earthquake in Haiti, ACE aimed to bring help to the Holy Cross community to recover and rebuild. In the fall of 2014, ACE Haiti launched "Haiti Reads," a literacy intervention with random assignment in 50 Haitian Catholic schools and 50 controls. The project serves 7,000 students, trains about 130 teachers, and implements a reading curriculum for students to learn to read in their native tongue, Creole, as well as French. Dr. Berends and his colleague Professor Andrew Elliot of the University of Rochester are working with ACE faculty and staff to study the effects of this literacy and teacher training intervention on student motivation and teachers' sense of efficacy, with the promise of informing and enhancing the design of this approach in Haiti and beyond.

This project builds on a previous randomized field trial that Dr. Berends co-led with colleagues at Vanderbilt (Drs. Doug Fuchs [PI], Lynn Fuchs, and Don Compton), University of Minnesota (Dr. Kristen McMaster), and University of Texas Pan American (Dr. Laura Saenz); the team examined the effects of an early reading program at scale with a randomized research design. For over a decade, a research group at Vanderbilt University has partnered with local school districts to develop reading Peer-Assisted Learning Strategies (PALS, Doug and Lynn Fuchs). Its purpose is to strengthen teachers' capacity to meet the academic needs of a broader range of children. PALS incorporates empirically validated, state-of-the-art practices for improving phonological awareness, decoding, and comprehension. The program has been empirically tested in multiple, large, randomized field trials. The study is a randomized field trial in Nashville, Minneapolis, and south Texas to assess the effects of PALS and factors related to scale-up in various settings across the nation.

## **New American Schools**

For several years, Dr. Berends led a multi-year research effort on New American Schools Development Corporation's (NAS) whole-school reforms. With RAND colleagues, he published *Facing the Challenges of Whole-School Reform: New American Schools After a Decade* (2002). The central focus of this effort assessed whether the NAS designs were associated with changes in schools, classrooms, and student outcomes. A significant component of this research monitored a longitudinal sample of over 100 schools through principal phone interviews, teacher surveys, and district-provided data between 1996 and 1999. A supplementary study on changes in classroom practices and student achievement trends provided more detailed information about how the NAS designs were related to changes in teaching and learning opportunities for students. The book from this study was published by RAND and entitled *Challenges of Conflicting School Reforms: Effects of New American Schools in a High-Poverty District* (2002). Such quantitative information on implemented practices, school and classroom characteristics, and performance outcomes will provide critical information on the progress of this national reform effort.

## **Social Context of Education**

Dr. Berends also led project that examines the effects of changing families and schools on student achievement trends, particularly those of black, Latino, and white students. With his collaborator Professor Sam Lucas of Berkeley, Dr. Berends' research examines whether changes in family background and school characteristics (e.g., desegregation and academic-track placement) account for the closing of the test score gap between minority and non-minority students in high- and low-poverty settings between 1972 and 2004.

## **Ability Grouping and Tracking**

Dr. Berends has conducted several studies on the effects of ability grouping and tracking on students' academic and social outcomes. This research has also examined the impact of instructional differences among grouped classes. Dr. Berends has examined the effects of tracking on students' school bonding and engagement, finding support for ethnographers' arguments that tracking polarizes students into pro- and anti-school orientations.

With Dr. Lucas, Dr. Berends is co-leading a project that examines the structure and effects of tracking in several data sets covering the experiences of several student cohorts over the past thirty years. The cohorts represented are sufficiently close together that a fine-grained understanding of trends in tracking and its effects may be obtained. The main questions are: (1) Has the *structure* of tracking changed over time? (2) What have been the patterns of track *mobility* over time? (3) How have the *effects* of track location on achievement changed over time after the effects of family, demographic, and school factors have been considered?

## **RESEARCH SUPPORT**

Principal Investigator, School Effectiveness in Indiana: An Examination of Impacts and the Conditions Under Which Choice is Effective. Spencer Foundation, Lyle Spencer Research Award-funded at \$999,024 over 3 years (October 2015-September 2018)

Principal Investigator, School Quality Matrix for Indianapolis 3.0. Walton Family Foundation-funded at \$240,159 over 3 years (September 2015-November 2018).

Principal Investigator, Effects of School Choice in Indiana. Walton Family Foundation-funded at \$299,423 over 3 years (October 2014—September 2017).

Principal Investigator, Examining Catholic School Effectiveness in Cities Across the United States. Walton Family Foundation-funded at \$1,340,000 over 6 years (June 2009-May 2015).

Principal Investigator, Sensitivity of Teacher Value-Added Results to Different Measures of Student Growth. U.S. Department of Education's Institute of Education Sciences-funded at \$150,000 (May 2011-December 2011). IES contract ED-IES-12-C-0004 by Regional Educational Laboratory Midwest, administered by American Institutes for Research.

Director, National Center on School Choice (NCSC). U.S. Department of Education Institute of Education Sciences -funded at \$10 million over 7 years (September 2004-September 2011).

Principal Investigator, Opening Up the Black Box of Choice and Regular Public Schools: A Study of Achievement Growth, Instruction & Alignment. U.S. Department of Education Institute of Education Sciences -funded at \$3.3 million over 5 years as part of the NCSC (September 2006-September 2011).

Co-Principal Investigator, Scaling Up Peer-Assisted Learning Strategies to Strengthen Reading Achievement. U.S. Department of Education Institute of Education Sciences -funded at \$5.5 million over 5 years (September 2004-September 2009).

Co-Principal Investigator, The Structure and Effects of Tracking in the United States: A Temporal Perspective. Spencer Foundation-funded at \$472,800 over 8 years (March 1997-February 2005).

Co-Principal Investigator, Explaining Student Achievement Trends, 1972-1992. U.S. Department of Education-funded at \$436,918 over 7 years (October 1996-December 2003).

Co-Principal Investigator, Monitoring the Progress of Title I and Comprehensive School Reform Demonstration Program (CSR/D) Schools, National Evaluation of Title I and CSR/D Programs. U.S. Department of Education-funded at \$1.76 million over 4 years (September 1999-June 2003).

Co-Principal Investigator, National Board for Professional Teaching Standards. NBPTS-funded at \$185,380 (March 2002-July 2002).

Project Director, National Study of Title I Schools. U.S. Department of Education-funded at \$1.9 million (October 2000-July 2002).

Co-Principal Investigator, The Quality of Instruction in High-Poverty Settings: Evidence from the Longitudinal Evaluation of School Change and Performance. U.S. Department of Education-funded at \$155,000 (February 2002-September 2002).

Co-Principal Investigator, Analytic Plan to Evaluate National Longitudinal Survey of Schools (NLSS) and Comprehensive School Reform Demonstration (CSR/D) Survey Data. U.S. Department of Education-funded at \$50,000 (March 1999-August 1999).

Co-Principal Investigator, RAND Assessment of New American Schools. New American Schools-funded at \$2.4 million for 5 years (December 1997-June 2002).

Co-Principal Investigator, Trends in High School Grade Inflation and its Correlates. College Entrance Examination Board-funded at \$190,945 for 3 years (August 1998-September 2001).

Co-Principal Investigator, Who's Teaching At-Risk Students? U.S. Department of Education-funded at \$299,986 for 3 years (October 1996-September 1999).
